

# CREATING A DATABASE IN CLOUDANT DB

**TEAM ID: PNT2022TMID47379**

**TEAM LEADER: NIRESHKUMAR S**

The screenshot displays the IBM Cloud console interface for managing a Cloudant database instance. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (Nireshkumar S's Account). The main content area is titled 'Cloudant-h5' and shows the instance is 'Active'. The left sidebar contains a 'Manage' section with links to Service credentials, Plan, and Connections. The main panel has tabs for Overview, Capacity, and Docs. The Overview tab is selected, showing deployment details such as CRN, Location (London), External endpoint, External endpoint (preferred), Authentication methods (IBM Cloud IAM), Activity Tracker event types (Management), and Disk encryption (Yes). The Capacity details section indicates the instance is subscribed to the Lite plan and shows a read rate of 20 per second. An 'Upgrade' button is visible in the bottom right corner of the Capacity section.
