

Create a Cloud Object Storage Service

TEAM ID: PNT2022TMID47379

TEAM MEMBER 2: VIGNESH V

The screenshot displays the IBM Cloud Object Storage management interface. The left sidebar contains navigation links for IBM Cloud, Cloud Object Storage, Storage instances, Cloud Object Storage-y2, Buckets, Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area shows the 'smartcropprotection' bucket under the 'Cloud Object Storage-y2' instance. The breadcrumb path is 'Storage / Cloud Object Storage-y2 / smartcropprotection'. The account name 'VIGNESH V's Account' is visible in the top right. Below the bucket name, there are tabs for 'Objects', 'Configuration', and 'Permissions'. A message states: 'If you're seeing more usage than expected, versions count towards your usage or you may have incomplete uploads [Learn more](#)'. The 'Objects' tab is active, showing a table with columns: Object name, Archived, Size, and Last modified. Below the table, there is a section titled 'Objects' with a description: 'Drag and drop files (objects) to upload. An object is your data in fixed form.' and a dashed box for uploading files with the text 'Drag and drop files (objects) here or click to upload'. An 'Upload' button is located in the top right of the objects section.
